

AI Automation (n8n, Make, Zapier AI)

Course syllabus · Mindfull Methods

Level: Beginner Friendly · Duration: 6 weeks · Format: Online

Pricing: INR 12,999 · Cohort-based

Overview

Connect the tools businesses already use. Build AI-powered automations with n8n, Make (Integromat), and Zapier AI: triggers, transforms, LLM steps, human approvals, and monitoring. Finish with a mentor-reviewed capstone workflow that saves real hours-not a diagram that never runs in production.

What you'll learn

- ? Map business processes into trigger ? action automation flows
- ? Add LLM steps with guardrails in n8n, Make, and Zapier
- ? Handle errors, retries, and human approval branches
- ? Deliver a documented capstone automation with ROI estimates

Weekly milestones

Week 1

- ? Automation mindset
- ? Triggers & actions
- ? Data mapping

Week 2

- ? Zapier AI basics
- ? Zaps + AI steps
- ? Testing

Week 3

- ? Make scenarios
- ? Routers & filters
- ? LLM modules

Week 4

- ? n8n workflows
- ? Self-host option
- ? Credentials

Week 5

- ? Approvals
- ? Logging
- ? Failure alerts

Week 6

- ? Capstone workflow
- ? ROI doc
- ? Mentor sign-off
